A3100 - 1F (A) 7/85

The facts about rabies are enough to make your cat furious.

More cats than dogs get rabies. In fact, 50% more.* That's because most people don't vaccinate their cats against this fatal disease. And that's enough to make any cat angry.

Have your cat vaccinated with Fel-O-Vax® PCT-R. It's the only vaccine that provides *three-year protection against rabies*,** and, at the same time, protects against panleukopenia, calici and rhinotracheitis (collectively known as feline distemper).

One shot instead of two or three means *less stress and discomfort*. And unlike other vaccines, the viruses in Fel-O-Vax PCT-R are killed and therefore safe.

The fact is, cats can get the "furious" type of rabies from infected cats, dogs, raccoons, skunks, bats and many other animals. Once infected, a cat often becomes vicious and can spread the fatal disease to humans.

So don't let rabies turn your cat into a green-eyed monster. Ask your veterinarian for Fel-O-Vax PCT-R.

Fel-O-Vax PCT-R

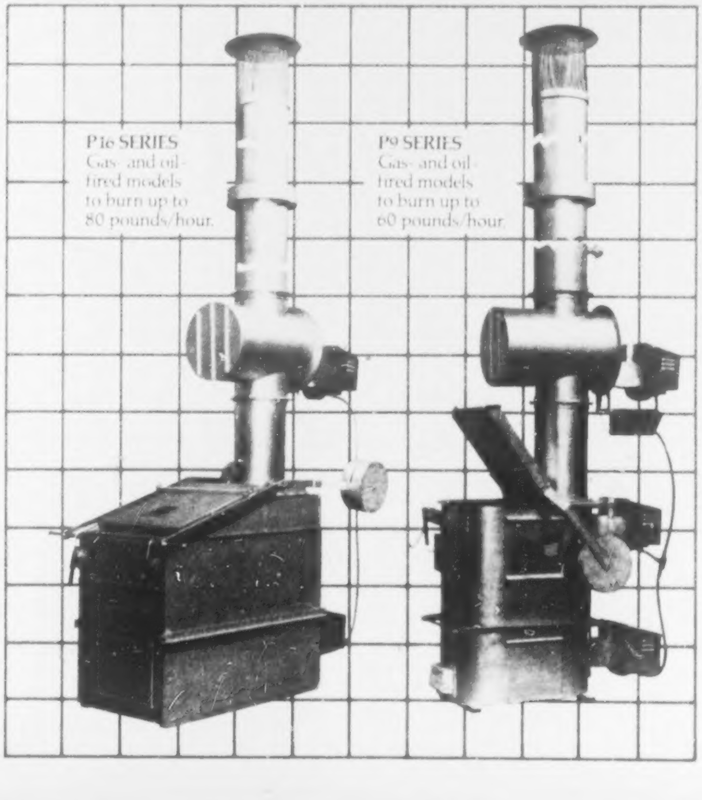
SHENANDOAH THREE-BURNER INCINERATORS

Designed to meet strict EPA requirements and priced to fit your budget

- Upper burner preheats secondary chamber, then cuts off to save fuel.
- Middle burner burns most smoke and odor before it reaches secondary chamber and maintains high temperature after upper burner cuts off.
- Lower burner ignites automatically after pre-set temperature is reached in secondary chamber, then operates continually.
- Timer and pyrometer start, control, and shut off burners automatically.
- Heavy-duty ceramic grate allows bottom-burning for fast, efficient operation.



P16 SERIES
Gas- and oil-fired models to burn up to 80 pounds/hour.

P9 SERIES
Gas- and oil-fired models to burn up to 60 pounds/hour.

- Low-maintenance aluminized steel jacket is lined with firebrick (P16 Series) or poured castable refractory (P9 Series).
- Insulated secondary chamber and connector stacks maintain specific dwell times and temperatures required for emission control.

For more information on Shenandoah incinerators—including two-burner models—designed and priced for your specific application, call toll-free: 800-336-4052 (Except Virginia: 703-434-3838.) Or write:

FOREWORD

The AVMA Directory lists AVMA members in the United States, Canada, and other countries and those nonmember veterinarians for whom data is available in AVMA records and who ask to be listed. The listings and statistics contained in the AVMA Directory do not reflect the total veterinary population in the United States or any other country. They include only the AVMA members and those nonmembers who responded to the verification survey by October 1, 1986.

We have attempted to assure the accuracy of our record data for every member during the past year. We assume that the listings are correct for those who did not reply. Anyone who discovers an error in his or her listing is asked to please advise us so that we can correct our records and future listings.

The AVMA Executive Board has approved the annual publication and distribution of the AVMA Directory to each member of the Association without additional charge.

The 1987 AVMA Directory consists of three sections:

The Alphabetical Section (pages 25 to 155) lists in alphabetic sequence the name, city, state, province, or country of each veterinarian and the member status code.

The Geographic Section (pages 161 to 407) lists, by state and town (or country), the veterinarian's name, spouse's name, full address, school and year of graduation, professional activity, type of employment, and employment function.

The Reference Section (pages 411 to 692) contains information on AVMA organization and history, names and addresses of other veterinary and related associations, federal and state government agencies, and veterinary colleges.

Bovicon-PM®

Pasteurella multocida vaccine, lyophilized live culture

First live vaccine with proven protection against Pasteurella Pneumonia caused by *Pasteurella multocida.*

Description

A live *Pasteurella multocida* vaccine for the immunization of healthy cattle as an aid in the prevention of infection due to *Pasteurella multocida*.

Indications

This vaccine is recommended for the immunization of healthy cattle a minimum of 7-10 days prior to weaning, shipping or exposure to stress or anticipated outbreaks of respiratory disease. For use in all dairy and beef operations.

Dosage and Administration

Inject 0.5 ml INTRADERMALLY. The use of a short ($^3/_{16}$" -¼") 22-24 gauge needle is recommended for the intradermal injection. Vaccination site should be palpated following administration to assure that the injection has been made intradermally. Any area of the animal is suitable, but the area of skin on the neck or in the caudal fold seems to be best.

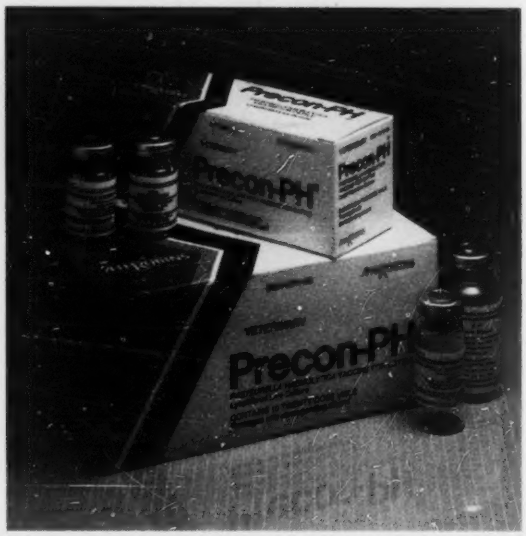
How Supplied

Bovicon-PM® is supplied lyophilized in 2.5 ml (5 dose) and 10 ml (20 dose) vials with separate vials of sterile diluent for reconstitution.

For full prescribing information, refer to insert.

Special Caution

Pasteurella multocida is a potential pathogen for humans. Read accompanying product literature carefully before use.



Precon-PH®

Pasteurella haemolytica vaccine, lyophilized live culture

First live vaccine with proven protection against Pasteurella Pneumonia caused by *Pasteurella haemolytica.*

Description

A lyophilized live *Pasteurella haemolytica* vaccine containing 4×10^6 organisms per 0.5 ml dose when reconstituted as directed.

Indications

For vaccination of healthy calves and cattle 7-10 days prior to stress conditions (e.g., weaning and shipping) and exposure to *Pasteurella haemolytica* organisms. Has been shown to reduce the incidence of mortality, morbidity, and culls due to Pasteurella Pneumonia caused by *Pasteurella haemolytica*. For use in all dairy and beef operations.

Dosage and Administration

The dose is 0.5 ml and must be administered INTRADERMALLY. The use of a short needle ($^3/_{16}$" x 22 gauge) with an automatic syringe that can be set to deliver 0.5 ml per dose is recommended. Any area on the animal is suitable, but the area of skin on the neck or in the caudal fold seems to be best.

How Supplied

Precon-PH® is supplied lyophilized in 2.5 ml (5 dose) and 10 ml (20 dose) vials with separate vials of sterile diluent for reconstitution.

For full prescribing information, refer to insert.

Note: When Bovicon-PM is administered at the same time as Precon-PH, the result is a vaccination program that effectively prevents Pasteurella Pneumonia caused by both principal bacterial pathogens of the bovine respiratory disease (shipping fever) complex. Do not mix the vaccines together in the same syringe. Vaccines must be administered separately and at different sites.

Dopram®-V Injectable

brand of doxapram hydrochloride

Provides dramatic, rapid-acting, respiratory stimulation at very low doses.

Description

Dopram®-V is a potent respiratory stimulant. It stimulates respiration and hastens arousal from anesthesia at dosages considerably below those required to evoke convulsions.

Indications

To stimulate respiration during and after anesthesia or in emergency situations in dogs, cats and horses. To speed awakening and return of reflexes after anesthesia. To initiate and/or stimulate respiration in neonates following dystocia or cesarean section.

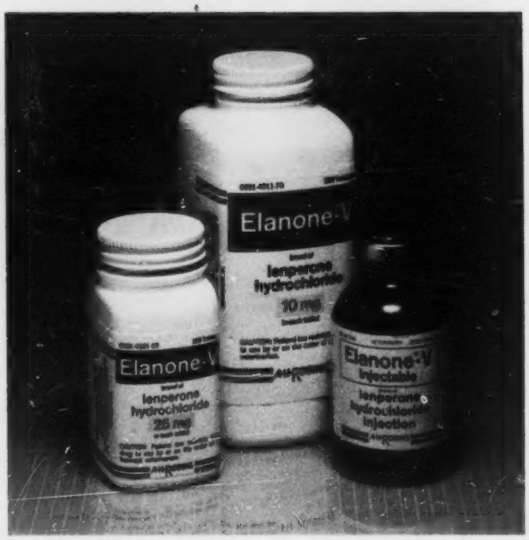
Dosage and Administration

Intravenous dosage is individualized according to species, condition treated, anesthesia used, etc. Dopram-V may be given to neonates either subcutaneously, sublingually (topically) or via the umbilical vein in doses of 1-5 drops (1-5 mg) depending on size and species of neonate and degree of respiratory crisis. See dosage chart in back of catalog.

How Supplied

Dopram-V is available in 20 ml (20 mg/ml) multiple-dose vials.

For full prescribing information, refer to package insert.



Elanone®-V

brand of lenperone hydrochloride

Reduces excitement and vomiting associated with travel; not contraindicated with organo-phosphate-containing flea collars, dips, sprays, etc.

Description

A tranquilizer of the butyrophenone group for dogs and cats with a low order of toxicity, rapid action, antiemetic activity and lack of hypnotic effect.

Indications

An aid in controlling intractable animals during examination, treatment, grooming, radiology, dental procedures, minor surgical procedures; to alleviate self-mutilation due to skin irritation; to control vomiting associated with motion sickness; pre- and postoperative medication; and in other conditions where a tranquilizer is indicated.

Dosage and Administration

Elanone®-V Injectable may be given IV or IM to dogs and cats. The recommended intravenous dose is .10 to .40 mg/lb. and the intramuscular dose is .20 to .80 mg/lb. Recommended oral dose for dogs is .25 to 1.0 mg/lb. and may be repeated at 5-8 hour intervals.

How Supplied

Elanone-V Injectable is supplied in 50 ml vials (5 mg/ml). Elanone-V tablets are supplied in 10 mg and 25 mg strengths in bottles of 100 and 500.

For full prescribing information, refer to package insert.

Robinul-V
Injectable
Glycopyrrolate

Robinul®-V Injectable

brand of glycopyrrolate

For prolonged control of anesthetic side effects and reduction of gastrointestinal hypermotility.

Description

A synthetic anticholinergic agent with a structure that limits its passage across the blood-brain and placental barriers. Antisalivary effects last up to 7 hours and the vagal-blocking effect persists for 2-3 hours; periods longer than for atropine.

Indications

For preanesthetic use in dogs and cats to diminish the volume and free acidity of gastric secretions and reduce intestinal motility. To diminish and control excessive pharyngeal, tracheal, and bronchial secretions and to control bradycardia.

Administration and Dosage

May be administered intravenously, intramuscularly, or subcutaneously to dogs and intramuscularly to cats at the rate of 5 micrograms/lb. of body weight (0.25 ml per 10 pounds body weight). See dosage chart in back of catalog.

How Supplied

20 ml vials (0.2 mg/ml).

For full prescribing information, refer to package insert.

Robaxin-V
Injectable
Robaxin-V
methocarbamol
500 mg

Robaxin®-V

brand of methocarbamol

Reduces painful skeletal muscle spasms without reduction of normal muscle tone.

Description

A potent skeletal muscle relaxant with an unusually selective action on the CNS, specifically on the internuncial neurons of the spinal cord resulting in a diminution of abnormal impulses within the spinal cord from areas of muscle hyperactivity (spasms). It is long-acting and essentially nontoxic, and has proved effective in a wide range of acute muscle spasm disorders.

Indications

For the treatment of acute skeletal muscle hyperactivity in intervertebral disc syndrome, compressive myelitis, intact spinal cord injury, muscular and ligamentous strains or sprains, strychnine poisoning, tetanus, tying up syndrome, and other conditions.

Dosage and Administration

Intravenous administration is usually preferred for initial relief in dogs, cats, and horses. Dosage is based on severity of symptoms and therapeutic response noted. Tablet dosage in dogs and cats is also individualized and is given at 8 to 12-hour intervals. Refer to dosage guide in back of catalog.

How Supplied

Robaxin®-V Injectable is supplied in 20 ml and 100 ml vials (100 mg/ml). Robaxin-V, 500 mg white scored tablets are packaged in bottles of 100 and 500.

For full prescribing information; refer to package insert.

Viokase®-V

pancreatic amylase, lipase and protease

New, improved pancreatic enzyme supplement with higher potency, reduced dosage requirements.

Description

Activated *whole raw pancreas;* a pancreatic enzyme concentrate of porcine origin containing standardized amylase, protease, and lipase activities plus esterases, peptidases, nucleases, and elastase.

Indications

As a digestive aid and for replacement therapy where digestion of protein, carbohydrate and fat is inadequate due to exocrine pancreatic insufficiency.

Dosage and Administration

Tablets are administered before each meal; powder is usually added to moistened dog food, mixed well, and incubated at room temperature for 15-20 minutes before feeding. Dosages should be adjusted until desired results are obtained.

Usual dosage	Dogs (each meal)	Cats (each meal)
Tablets	2-3	½-1
Powder	¾-1 teaspoonful	¼-¾ teaspoonful

Precautions

Discontinue use in animals with symptoms of sensitivity.

New Formulation

	Tablet	Powder
Lipase	9,000 USP Units	71,400 USP Units
Protease	57,000 USP Units	388,000 USP Units
Amylase	64,000 USP Units	460,000 USP Units

Powder—Bottles of 4 ounces, 8 ounces, and 12 ounces.

Z-BEC® Veterinary

chewable vitamin/mineral tablets

Brings a special zinc/vitamin combination to dogs and cats.

Each tablet provides:

Zinc Sulfate (20 mg elemental zinc)	90 mg
Vitamin E	40 I.U.
Vitamin C	150 mg
Vitamin B_1	5 mg
Vitamin B_2	5 mg
Niacin	10 mg
Vitamin B_6	3 mg
Vitamin B_{12}	12 mcg
Pantothenic Acid	10 mg

In a palatable base containing liver, wheat germ, and animal products.

Actions and Uses

Z-BEC® Veterinary Chewable Tablets are recommended in conditions where supplemental zinc, B-complex vitamins, vitamin E, and vitamin C are indicated, such as may occur in geriatric dogs or cats with decreased efficiency in nutrient digestive and absorptive processes.

Z-BEC® Veterinary Chewable Tablets are also recommended as a dietary supplement for dogs or cats of all sizes and ages to aid in the prevention of deficiencies of zinc, B-complex vitamins, vitamin E and vitamin C.

Suggested Daily Dosage

Dogs: 1 to 4 tablets; Puppies: ½ to 1 tablet; Cats: ½ to 1 tablet. Tablets may be fed orally or crumbled and mixed with food.

How Supplied

Z-BEC® Veterinary Chewable Tablets are available in bottles of 60 and 120 tablets.

Robamox®-V Tablets

Robamox®-V Veterinary Oral Suspension

brand of amoxicillin

Amoxicillin in convenient strengths and dosage forms for dispensing. Amoxicillin is stable in the presence of gastric acid so it can be given without regard to meals.

Description

Robamox®-V (amoxicillin) is a broad spectrum, semisynthetic penicillin which provides bactericidal activity against a broad spectrum of common pathogens. It is rapidly absorbed following oral administration and diffuses readily into most body fluids and tissues.

Indications

For the treatment of bacterial dermatitis and soft tissue infections (abscesses, wounds, lacerations) in dogs when caused by susceptible strains of organisms.

Dosage and Administration

The recommended dose is 5 mg per pound of body weight administered twice daily for 5-7 days or 48 hours after all symptoms have subsided. If no improvement is noted in 5 days, the diagnosis should be reconsidered and therapy changed. Refer to dosage guide in back of catalog.

How Supplied

Robamox®-V (amoxicillin) tablets are supplied in 50 mg, 100 mg, and 200 mg strengths in bottles of 500 and 1000 tablets; and 400 mg strength in bottles of 250 and 500 tablets. Suspension is supplied as a powder in 15 and 30 ml bottles. After reconstitution as directed, each ml will contain 50 mg of amoxicillin as the trihydrate.

For full prescribing information, refer to package insert.

VETERINARY
GUAILAXIN

Guailaxin®

brand of guaifenesin
(formerly "glyceryl guaiacolate") sterile powder

Time-tested and proven central-acting skeletal muscle relaxant for horses. Conveniently packaged to fit your method of usage.

Description

An intravenous muscle relaxant for horses which provides smooth induction and recovery. Can be used alone for muscle relaxation or mixed with thiamylal sodium for anesthesia. Pyrogen-free.

Indications

Guailaxin® (guaifenesin) is an excellent drug for use as a muscle relaxant during induction of general anesthesia with both injectable and inhalant anesthetics. When used as directed with thiamylal sodium, anesthesia is usually adequate for short surgical procedures.

Dosage and Administration

Guailaxin should be administered only by the intravenous route. Add sufficient warm sterile water to 50 grams of the sterile powder to produce one liter of solution and administer by rapid intravenous infusion at a dose of 1 ml per pound of body weight. If thiamylal sodium is to be added, add 2 grams of the barbiturate to 50 grams of Guailaxin sterile powder before adding sufficient sterile water to make 1 liter of solution. This provides 50 mg of guaifenesin and 2 mg of thiamylal sodium per ml of solution and is also dosed at 1 ml per pound of body weight by rapid intravenous infusion.

How Supplied

Guailaxin (guaifenesin) Sterile Powder is supplied 50 g per container in 4 oz. containers and 32 oz. containers.

For full prescribing information, refer to package insert.

Carpet Control™
Carpet Insecticide and Freshener
Kills Fleas, Freshens Carpets

Carpet Control™

carpet insecticide and freshener

Combination carpet insecticide and freshener in one powder formulation. Periodic treatment provides effective control of fleas, ticks, lice, roaches, ants and silverfish that live and breed in carpets.

Description

Carpet Control™ is a combination of two pyrethroids (d-phenothrin, d-trans allethrin) plus a synergist (piperonyl butoxide) that provides fast knockdown, quick kill of insects, and a low degree of toxicity to humans and pets.

Sodium bicarbonate plus a citrus fragrance combine to leave a fresh, clean-smelling carpet and room.

Application

Sprinkle evenly and lightly over carpet and adjacent floors. One cannister covers a 12 ft. by 15 ft. room. Vacuum in 30 minutes; 2 hours if ticks are present.

Residual Activity

Proper vacuuming takes up the powder along with pests, leaving no highly-active residue.

How Supplied

Carpet Control™ carpet insecticide and freshener is provided in powder form in ready-to-use containers (net wt. 14 oz.; 396 grams).

Dopram®-V

brand of
Doxapram Hydrchloride

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Indications: For dogs, cats and horses: (1) to stimulate respiration during and after general anesthesia; (2) to speed awakening and return of reflexes after anesthesia.

For neonate dogs and cats: (1) to initiate respirations following dystocia or cesarean section; (2) to stimulate respirations following dystocia or cesarean section.

Dosage and Administration: The action of Dopram-V is rapid, usually beginning in a few seconds. The duration and intensity of response depend upon the dose, the condition of the animal at the time the drug is administered, and depth of anesthesia. Repeated doses should not be given until the effects of the first dose have passed and the condition of the patient requires it. Dosage should be adjusted for depth of anesthesia, respiratory volume and rate. Dosage can be repeated in 15 to 20 minutes, if necessary.

	Barbiturate Anes.	**Gas Anes.**
Dogs and Cats	2.5 to 5.0 mg/lb.	0.5 mg/lb.
Horses	0.25 mg/lb.	0.2 mg/lb.

Neonates: canine 1-5 drops, feline 1-2 drops.

Caution: For intravenous use only in dogs, cats and horses. May be administered subcutaneously, sublingually (topically) or via umbilical vein in neonatal puppies and either subcutaneously or sublingually (topically) in neonatal kittens. Do not mix with alkaline solutions. Dopram-V is neither an antagonist of muscle relaxant drugs nor a specific narcotic antagonist. Doses of Dopram-V should be adjusted to meet the requirements of the situation. Excessive doses may produce hyperventilation which may lead to respiratory alkalosis. A patent air passageway is essential. Adequate, but not excessive, doses should be used and the blood pressure and reflexes should be checked periodically.

Supplied: Dopram-V (doxapram hydrochloride) is available in 20 ml multiple dose vials of the sterile solution. Each 1 ml contains 20 mg doxapram hydrochloride.

Elanone®-V

brand of
Lenperone Hydrochloride

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Indications:
Elanone®-V can be used in dogs and cats as an aid in controlling intractable animals during examination, treatment, grooming, radiology, dental procedures, minor surgery procedures; to alleviate self-mutilation due to itching as a result of skin irritation; as an antiemetic to control vomiting associated with motion sickness; pre- and postoperative medication; and in other conditions where a tranquilizer is indicated.

Dosage and Administration: Dogs and cats; parenteral: Elanone®-V Injectable may be given intravenously or intramuscularly. The recommended intravenous dose is .10 to .40 mg/lb. and the intramuscular dose is .20 to .80 mg/lb. Do not exceed 4 ml per injection site when administering intramuscularly. Oral—dogs only: The recommmended oral dose is .25 to 1.0 mg/lb. The dose may be repeated at 5- to 8-hour intervals.

Precautions: There are no known contraindications to the use of lenperone in dogs or cats. Generally, this class of drug should not be given if some central nervous system depression or hypotension is unwanted. Following a full therapeutic dose of lenperone, a full anesthetic dose may not be required. Although rat studies have indicated no adverse effects on the pregnant female, fetus, or neonate, Elanone®-V should not be used during pregnancy unless in the judgment of the veterinarian the potential benefits outweigh the possible hazards.

Toxicology: Acute and chronic toxicity studies have shown lenperone to have a low order of toxicity. The LD_{50} in cats by either intravenous or intramuscular injections was greater than 16 mg/kg. In dogs the LD_{50} by intravenous, intramuscular, and oral administration was greater than 24, 32, and 128 mg/kg, respectively. Chronic toxicity studies in dogs, cats, and rats indicate no adverse effects on physical condition, pharmacological signs, electrocardiogram, heart rate, blood pressure, hemogram or blood chemistry. A teratological study in rats showed lenperone to have no teratological effect.

Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Supplied:
Elanone®-V Injectable (lenperone hydrochloride) is supplied in 50 ml vials (5 mg/ml). Elanone®-V (lenperone hydrochloride) 10 mg tablets in bottles of 100 and 500, and 25 mg tablets in bottles of 100 and 500.

Guailaxin®

brand of
Guaifenesin Sterile Powder

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Indications: Guailaxin (guaifenesin) is indicated for intravenous administration for muscle relaxation in horses.

Dosage and Administration: 50 grams of guaifenesin sterile powder is mixed with sufficient warm USP sterile water to make 1 liter of solution. This 5% solution is given by rapid intravenous infusion at a dose of 1 ml per pound of body weight. The duration of action is usually 10-20 minutes for a single dose. When thiamylal sodium is to be added, 2 g of the barbiturate should be added to the 50 g Guailaxin sterile powder prior to dissolving in USP sterile water to make 1 liter of solution. This provides 2 mg of thiamylal sodium and 50 mg of guaifenesin per ml of solution. This solution is also dosed at 1 ml per pound of body weight and administered by rapid intravenous infusion.

Contraindications: Administration of physostigmine is contraindicated in horses receiving guaifenesin.

Precautions: Perivascular leakage should be avoided. Do not use in concentrations greater than 5%. Use caution when anesthetizing anemic or hypovolemic animals with cardiac or respiratory problems. Oxygen should be available when guaifenesin is used in conjunction with barbiturates or tranquilizers.

Supplied: Guailaxin (guaifenesin) sterile powder is supplied 50 grams per container in 4 oz. and 32 oz. containers.

Robamox®-V Tablets/Robamox®-V Veterinary Oral Suspension

brand of
Amoxicillin

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Indications: Robamox®-V (amoxicillin) tablets and suspension are indicated in the treatment of the following infections in dogs when caused by susceptible strains of organisms:

Bacterial dermatitis due to *Staphylococcus aureus*, *Streptococcus spp.*, *Staphylococcus spp.*, and *E. coli*.

Soft tissue infections (abscesses, wounds, lacerations) due to *Staphylococcus aureus*, *Streptococcus spp.*, *E. coli*, *Proteus mirabilis*, and *Staphylococcus spp.*

As is true with all antibiotic therapy, appropriate *in vitro* cultures and sensitivities should be conducted prior to treatment.

Contraindications: Use of amoxicillin is contraindicated in animals with a history of an allergic reation to penicillin.

Adverse Reactions: Amoxicillin is a semisynthetic penicillin and, therefore, has the potential for producing allergic reactions. Epinephrine and/or steroids should be administered if an allergic reaction occurs.

Warning: For use in dogs only.

Precautions: Until adequate reproductive studies are accomplished, Robamox®-V tablets or suspension should not be used in pregnant or breeding animals.

Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Supplied: Tablets—50 mg, 100 mg, and 200 mg strengths in bottles of 500 and 1,000 tablets; 400 mg strength in bottles of 250 and 500 tablets. Suspension—15 and 30 ml vials. When reconstituted as directed, each ml will cotnain 50 mg of amoxicillin.

Robaxin®-V

brand of
Methocarbamol

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Indications: Dogs and cats: ORAL AND INTRAVENOUS. Horses: INTRAVENOUS. Robaxin-V is indicated as an adjunct to therapy of acute inflammatory and traumatic conditions of the skeletal muscle to reduce muscular spasms, and effect striated muscle relaxation.

Dosage and Administration: INJECTABLE. Dogs and cats: For relief of moderate conditions, a dose of 1/5 ml per pound (20 mg per pound) body weight may be adequate. An initial dose of ¼ to 1 ml per pound of body weight is suggested for controlling the severe effects of strychnine and tetanus.

Horses: Give drug to effect; moderate conditions, a dose of 2 to 10 mg/lb.; for severe conditions (tetanus), a dose of 10 to 25 mg/lb.

TABLETS. Dogs and cats: The usual canine and feline dose of Robaxin-V is 60 mg per pound of body weight in divided doses followed by 30 or 60 mg per pound of body weight each following day. The total daily dose should be divided into 2 or 3 equal doses.

Contraindications: Robaxin-V should not be used during pregnancy unless in the judgment of the veterinarian the potential benefits outweigh the possible hazards. Robaxin-V Injectable (methocarbamol) should not be administered to patients with known or suspected renal pathology. Methocarbamol is contraindicated in patients hypersensitive to the ingredients.

Warning: Not to be used in horses intended for food.

Precautions: In dogs and cats, the rate should not exceed 2 ml per minute. Since Robaxin-V Injectable (methocarbamol) is hypertonic, vascular extravasation must be avoided. A recumbent position will reduce the likelihood of side reactions. In the horse, the most effective response is achieved by injecting rapidly through a 15 or 17 gauge needle. Blood aspirated into the syringe does not mix with the hypertonic solution. The blood may be safely injected with the methocarbamol or the injection may be stopped when the plunger reaches the blood.

Side Effects: Excessive salivation, emesis, muscular weakness and ataxia have been noted in both dogs and cats.

Supplied: Robaxin-V Injectable is supplied in 20 ml and 100 ml vials (100 mg/ml). Robaxin-V 500 mg tablets are supplied in bottles of 100 and 500.

Robinul®-V

brand of
Glycopyrrolate

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Indications: Preanesthetic use for dogs and cats. Robinul-V (glycopyrrolate) is indicated for use as a preoperative agent to reduce salivary, tracheobronchial, and pharyngeal secretion; to reduce the volume and free acidity of gastric secretion; and to block cardiac vagal inhibitory reflexes during induction of anesthesia and intubation.

Dosage and Administration: Robinul-V (glycopyrrolate) Injectable may be administered intravenously, intramuscularly, or subcutaneously to dogs and intramuscularly to cats at the rate of 5 micrograms/lb. of body weight (0.25 ml per 10 pounds body weight).

Precautions: There are no absolute contraindications to the use of Robinul-V Injectable in conjunction with anesthesia except known hypersensitivity to glycopyrrolate. Robinul-V should not be administered to pregnant bitches or queens. The excretion of Robinul-V may be prolonged in animals with impaired renal or gastrointestinal function.

Side Effects: Mild mydriasis, xerostomia, and occasional tachycardia may be seen with Robinul-V.

Supplied: Robinul-V Injectable (glycopyrrolate) is supplied in 20 ml vials (0.2 mg/ml).

Viokase®-V

Pancreatic lipase,
protease and amylase

BRIEF SUMMARY
(Before prescribing or administering, see full prescribing information.)

Description: Viokase-V is activated whole raw pancreas; a pancreatic enzyme concentrate of porcine origin containing standardized amylase, protease and lipase activities plus esterases, peptidases, nucleases and elastase.

Indications: As a digestive aid; replacement therapy where digestion of protein, carbohydrate and fat is inadequate due to exocrine pancreatic insufficiency. To aid digestion and absorption, a bland and easily digested diet containing sufficient quantities of good quality proteins and carbohydrates and low levels of fat is recommended.

Dosage and Administration: The Viokase-V tablets are administered before each meal. Viokase-V powder is added to moistened dog food (canned or dry). Thorough mixing is necessary to bring the enzymes into close contact with food particles. Incubation at room temperature for 15-20 minutes before feeding appears to enhance the digestive process. Frequent feeding, at least 3 times daily, is important.

Usual Dosage: Dogs: 2 to 3 tablets or ¾ to 1 teaspoonful with each meal. Cats: ½ to 1 tablet or ¼ to ¾ teaspoonful with each meal. NOTE: No one regimen will be successful for every patient. The above dosage should be adjusted according to the severity of the pancreatic exocrine deficiency and weight of the animal. In cases of chronic insufficiency, the dosage should be increased until desired results are obtained.

Precautions: Discontinue use in animals with symptoms of sensitivity.

Supplied: Viokase-V—425 mg each in bottles of 100 and 500. Viokase-V Powder—bottles of 4, 8 and 12 ounces.

New Formulation:

	Tablet	Powder
Lipase	9,000 USP Units	71,400 USP Units
Protease	57,000 USP Units	388,000 USP Units
Amylase	64,000 USP Units	460,000 USP Units

Dosage Guides

1. Dopram®-V Dosage

			Neonates	
(20 mg/ml)	**Horses**	**Dogs, Cats**	**Dogs**	**Cats**
Barbiturates	1.25 ml/100 lbs.	1/8-1/4 ml/lb.	1-5 drops	1-2 drops
Inhalation	1.00 ml/100 lbs.	1/40 ml/lb.	1-5 drops	1-2 drops
Route	IV	IV	Umbilical vein, Sublingually, Subcutaneously	Sublingually, Subcutaneously

Repeat Dose: After effects of first dose have passed, usually 15-20 minutes.

2. Elanone®-V Dosage

Injectable (5 mg/ml): Dogs and cats—IV or IM

Dose	Effects Usually Begin	Effects Usually Disappear
IV: 1 ml/50 lbs. (low dose)	3 to 5 minutes	1 to 2 hours
to 1 ml/12.5 lbs. (high dose)	3 to 5 minutes	5 to 6 hours
IM: 1 ml/25 lbs. (low dose)	10 to 15 minutes	1 to 2 hours
to 1 ml/6.25 lbs. (high dose)	10 to 15 minutes	5 to 6 hours

Note: The dosage should be individualized and will depend on the clinical procedure and degree and duration of tranquilization required. Do not exceed 4 ml (20 mg) per injection site when administering IM.

Oral (10 mg, 25 mg tablets).

Dose	Effects Usually Begin	Effects Usually Disappear
1 mg/4 lbs. (low dose)	within 30 minutes	3 to 4 hours
to 1 mg/1 lb. (high dose)	within 30 minutes	5 to 8 hours

Note: The dose may be repeated at 5 to 8-hour intervals, depending on degree and duration of tranquilization desired.

3. Robamox®-V Dosage

Tablets

Dose is 5 mg per pound of body weight twice a day (B.I.D.).

50 mg tablet B.I.D. per 10 lbs. BW
100 mg tablet B.I.D. per 20 lbs. BW
200 mg tablet B.I.D. per 40 lbs. BW
400 mg tablet B.I.D. per 80 lbs. BW

Suspension

(50 mg per ml) dose is 1 ml B.I.D. per 10 lbs. body weight—for 7 days' treatment dispense 15 ml size to animals up to 10 lbs. BW and 30 ml size to animals from 11-20 lbs. BW.

4. Robaxin®-V Dosage

	Dogs, Cats	Horses
Injectable (IV)—100 mg/ml	1/5 to 1 ml/lb.	2-25 ml/100 lbs.
(Administer 1/2 the estimated dose rapidly, continue to effect)		
Tablets (500 mg)	1st day = 20 mg/lb. tid 2nd day on = 10 mg/lb. tid	NA

5. Robinul®-V Dosage

Dogs—IM, SC, IV
Cats—IM

Dose by any route is 0.25 cc per 10 pounds of body weight

5 lbs. - 1/8 ml	20 lbs. - 1/2 ml	40 lbs. - 1 ml
10 lbs. - 1/4 ml	25 lbs. - 5/8 ml	60 lbs. - 1-1/2 ml
15 lbs. - 3/8 ml	30 lbs. - 3/4 ml	80 lbs. - 2 ml

Give 15-30 minutes before anesthetic administration.

New BOVICON-PM and PRECON-PH are the first live vaccines offering complete protection against the costly Pasteurellas.

BOVICON-PM protects against *Pasteurella multocida*. PRECON-PH protects against *Pasteurella haemolytica*. When BOVICON-PM is administered at the same time as PRECON-PH, the result is a vaccination program that effectively prevents Pasteurella pneumonia caused by both principal bacterial pathogens of the bovine respiratory disease (shipping fever) complex.

Help your clients protect their herds against these two killers. Ask your distributor representative about the Pasteurella Pneumonia Prevention Program with BOVICON-PM and PRECON-PH from A. H. Robins.

Vaccine provided in lyophilized form in 5 or 20 dose vials.

Special Caution:
Pasteurella multocida is a potential pathogen for humans. Read accompanying product literature carefully before use.

Precon-PH®

Pasteurella haemolytica vaccine, lyophilized live culture

Bovicon-PM®

Pasteurella multocida vaccine, lyophilized live culture

For additional information, contact A.H. Robins Marketing Department.

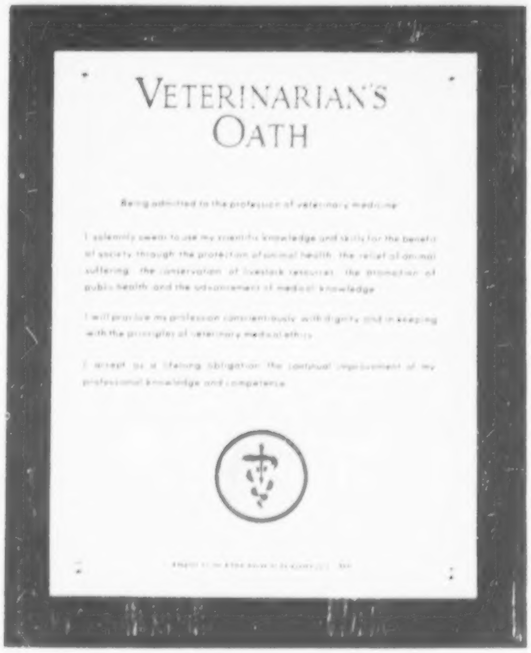
VETERINARIAN'S OATH PLAQUE



VETERINARIAN'S
OATH

Being admitted to the profession of veterinary medicine

I solemnly swear to use my scientific knowledge and skills for the benefit of society through the protection of animal health, the relief of animal suffering, the conservation of livestock resources, the promotion of public health and the advancement of medical knowledge.

I will practice my profession conscientiously with dignity and in keeping with the principles of veterinary medical ethics.

I accept as a lifelong obligation the continual improvement of my professional knowledge and competence.

NEW— **for office, hospital or den—a handsome walnut plaque with the Veterinarian's Oath mounted under plexiglass.**

This Oath was designed by the AVMA Judicial Council and adopted by the 1969 AVMA House of Delegates. Profits from sale of plaques go to AVMA Foundation.

Plaque measures 10½ x 13 inches
Complete with chain for immediate hanging

PRICE: $25.00, plus $3.00 for shipping and handling

The IDEAL GIFT for your favorite Veterinarian

ORDER FORM

Mail to Auxiliary to the AVMA
227 South Wind Place
Manhattan, KS 66502

Enclosed is my check made out to the AVMA Auxiliary for $28.00. Please send a Veterinarian's Oath Plaque to

the future of your profession . . .

TOMORROW'S VETERINARIAN

. . . an AVMA motion picture

20 minutes ***color*** ***16mm-sound***

Students, faculty, and administrators at Kansas State University's College of Veterinary Medicine describe the challenges of modern veterinary education and the public service role of the institution, including:

✓ *admissions process*
✓ *classroom lectures*
✓ *laboratory sessions*
✓ *clinical training & farm calls*
✓ *research programs*
✓ *diagnostic services*
✓ *and a little bit of history*

Show it to:

- Career & science classes
- Pre-veterinary clubs
- Guidance counselors
- Service organizations
- 4-H, FFA, and youth clubs
- Agricultural groups

Not for Television Broadcast

Members may borrow film No. 213, "Tomorrow's Veterinarian", by writing or calling:

AVMA Audiovisual Library
c/o Modern Talking Picture Service
Scheduling Center
5000 Park Street North,
St. Petersburg, FL 33709
(813) 541-5763

PROTECT YOUR CLIPPERS!

Lubricate, Disinfect and Cool with Just One Blast on Blades!

CLIPPERCIDE
SPRAY

Only **CLIPPERCIDE** will kill germs as it simultaneously lubricates the blades, cleans and cools. Economical too. Help protect against cross infection!

Order **CLIPPERCIDE** from your supplier now and keep your clipper blades disinfected, lubricated, sharp—ready to use at all times. Your supplier has **CLIPPERCIDE** or can get it for you.

America's Oldest Publisher — Since 1785

NEW BOOKS! 10 titles you'll want on your reference library shelf

- **ADAMS' LAMENESS IN HORSES, 4th ed.**
Edited and with contributions by TED S. STASHAK, D.V.M., *Colorado State University College of Veterinary Medicine and Biomedical Sciences.* Includes chapters on the role of nutrition in the development of musculoskeletal diseases, diseases of joints and related structures, and specific diseases associated with various regions of the appendicular and axial skeleton. *906 pp. (8½ × 11), 885 illus., 1987, $85.00.*

- **SCHALM'S VETERINARY HEMATOLOGY, 4th ed.**
By NEMI C. JAIN, Ph.D., *University of California, Davis, California.* All aspects of basic and applied hematology are thoroughly discussed, with emphasis on pathophysiologic, pathogenetic, and diagnostic implications in diseases of animals. Current concepts of hematopoiesis are discussed to reflect changing views in the origin of blood cells. *1221 pp. (7¼ × 10¼), 488 illus. (including 25 color plates with 202 illus.), 1986, $125.00.*

- **SMALL ANIMAL REPRODUCTION AND INFERTILITY: A Clinical Approach to Diagnosis and Treatment**
Edited and with contributions by THOMAS J. BURKE, D.V.M., *University of Illinois College of Veterinary Medicine, Urbana, Illinois.* All important facets of normal and abnormal canine and feline reproduction are included in this remarkable gathering of current and practical information. *408 pp., 150 illus. (including 4 color plates), 1986, $42.50.*

- **CLINICAL ENDOCRINOLOGY OF COMPANION ANIMALS**
By C. B. CHASTAIN, D.V.M., *and* V. K. GANJAM, B.V.Sc., Ph.D., *both of University of Missouri College of Veterinary Medicine, Columbia, Missouri.* Following an introduction that summarizes the history of clinical endocrinology, control mechanisms, actions, and measurements of hormones are six separate sections, each devoted to a specific endocrine organ. *568 pp., 152 illus., 1986, $49.50.*

- **ESSENTIALS OF VETERINARY BACTERIOLOGY AND MYCOLOGY, 3rd ed.**
By G. R. CARTER, D.V.M., *Virginia-Maryland Regional College of Veterinary Medicine, Virginia Tech.* Part I addresses basic scientific principles. Part II contains the essential information on all the bacterial pathogens with which the veterinary student should be familiar. Part III includes an introduction to fungi and fungous diseases. *261 pp. (8½ × 11), illus., paperback, 1986, $29.50.*

- **A COLOUR ATLAS OF EQUINE PARASITES**
By DENNIS E. JACOBS, *Royal Veterinary College, London, England.* Featuring hundreds of carefully chosen color photographs, equine parasites of the skin, blood, stomach, small and large intestine, liver, lung and other tissues are all expertly shown and summarized. Each section of the book is prefaced by a comprehensive, highly technical introduction. *184 pp. (5⅞ × 8½), 428 illus. (includes 419 in full color), 1986, $39.50.*

- **VETERINARY CANCER MEDICINE, 2nd ed.**
Edited and with contributions by GORDON H. THEILEN, D.V.M., *and* BRUCE R. MADEWELL, V.M.D., *both of the School of Veterinary Medicine, University of California, Davis, California.* New chapters on the etiology of cancer, cytodiagnosis of new clinical trials, and new methods of therapy are important additions to the second edition. *About 650 pp. (8½ × 11), 401 illus., April 1987, In Prep.* **About $85.00.**

- **EQUINE SURGERY: Advanced Techniques**
By C. WAYNE McILWRAITH, B.V.Sc., Ph.D., M.R.C.V.S. *and* A. SIMON TURNER, B.V.Sc., *both of Colorado State University College of Veterinary Medicine and Biomedical Sciences, Fort Collins, Colorado.* Introductory chapters are followed by over 50 surgical procedures, divided into orthopedic, upper respiratory, gastrointestinal and urogenital sections. *About 250 pp. (8½ × 11), 293 illus., May 1987, In Prep.* **About $50.00.**

- **EQUINE RADIOGRAPHIC PROCEDURES**
By ANNE L. MENDENHALL, R.T., *and* H. DAN CANTWELL, D.V.M., *both of Purdue University Large Animal Clinics, West Lafayette, Indiana.* This handbook presents a discussion of equine radiography with emphasis placed on patient positioning, beam direction and helpful views. Equipment needs and technical problem solving are also considered. *About 135 pp. (7¼ × 10¼), 159 illus., Summer 1987, In Prep.* **About $24.50.**

- **TEXTBOOK OF VETERINARY HISTOLOGY, 3rd ed.**
Edited and with contributions by H.-DIETER DELLMANN, Dr. med vet., Ph.D., *Iowa State University; and* ESTHER M. BROWN, Ph.D., *University of Missouri.* This successful text continues to present the essentials of histology in a clear, easy-to-understand manner. *469 pp. (7 × 10), 476 illus. (3 plates in color), 1987, Ready November 1986, In Prep.* **About $39.50.**
